

# Working Together Ideas

Friday 27<sup>th</sup> November 2017

1. This week we have been looking at height. Encourage your child to explore this at home. This could be orally, for example talking about their tallest and the shortest family member. You could explore this practically by finding different items around the house; toys and pencils etc using the vocabulary tallest, shortest and the same. We would love to see recordings of this in your child's learning log.

2. This half term we are learning about Arctic animals. To challenge your creativity- you could try to design and make your own Arctic animal inspired hat or mask. Which Arctic animal will you be? We would love to see any creations that you design or make?
