

# Working Together Ideas

Friday 8th December 2017

1. The children have really enjoyed experimenting with ice, it has been lovely to hear the children sharing what they already know and building upon the ideas of others. Please can you spend some time with your child discussing what they have learnt and get them to record their ideas. They can add a picture and label it or even have a go at writing a caption.

2. Have a go at being a scientist. Can you think of an experiment you could carry out at home using ice? You may want to freeze ice cubes with food colouring in, what happens to them when they melt? Have a go at finding out what happens when you put salt on ice or have a go at creating your own experiment. Take a photograph of your experiment so you can tell a friend about it. You can email your photographs to [admin@montbelle.org.uk](mailto:admin@montbelle.org.uk)
