

Working Together Ideas

Friday 22nd January 2016

1. The children had a wonderful time exploring the London Aquarium. We would like them to draw a picture of their favourite memory from the day and write (or an adult can scribe) a sentence or caption to go alongside their picture. Please encourage your child to work as independently as possible as this is something we are encouraging in class.

2. This week we have been looking at height and length. Encourage your child to explore this at home. This could be orally, for example talking about the longest sea creature they saw at the Aquarium and the shortest. You could explore this practically by finding different items around the house; books, pencils etc, and talking about which one is the longest or tallest and attempting to order the objects by size. We would love to see recordings of this in your child's learning log.
